1. [Updated] June 20, 2024 YMS Release Notes

This article was updated on Thursday, June 13, 2024 and Monday, June 17, 2024. The changes made to the original posting are listed here:

- June 13, 2024 Updates:
 - The release date changed from June 19, 2024 to June 20, 2024 because of the US holiday on June 19th.
 - Title was changed from June 19, 2024 YMS Release Notes to June 20, 2024 YMS Release Notes.
- June 17, 2024 Updates:
 - Three (3) YMS Bug Fixes. Indicated below.
 - Three (3) Feature Updates. Indicated below.

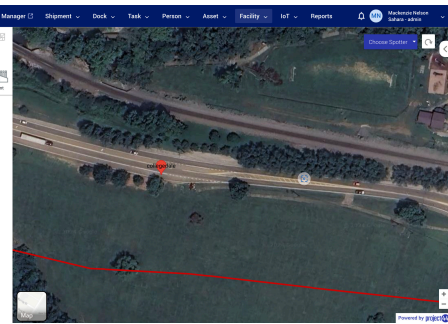

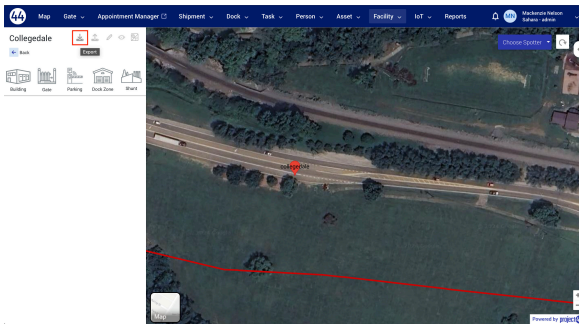

1.1. Feature Updates

1.1.1. Export and Import Site Maps

Users Impacted: Administrators

Update Summary: Export or import a site, building, gate, parking zone, dock zone, or spotter zone map in Map Builder. **Please work with your project44 Implementation contact or Customer Success Manager to import site maps.**

Supporting Documentation: [Export a Site Layout](#), [Import a Site Layout](#)

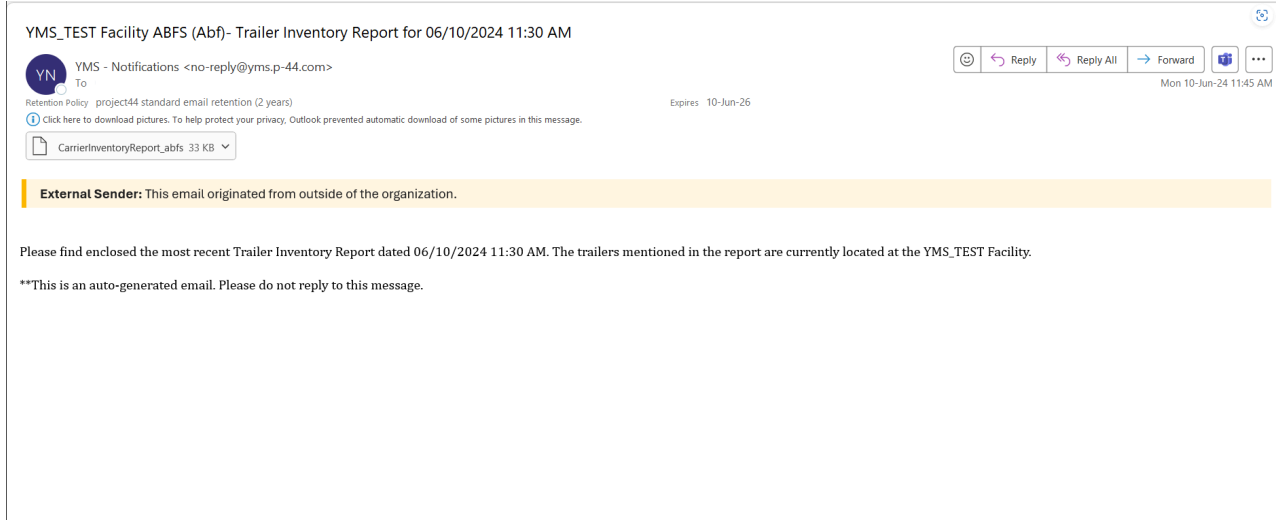

1.1.2. New Carrier Notification Email Formatting

Users Impacted: Carriers

Update Summary: When Carriers receive an automatic notification with the current Yard Inventory Report, the email now includes the Carrier SCAC in the email subject and the report attached as a PDF.

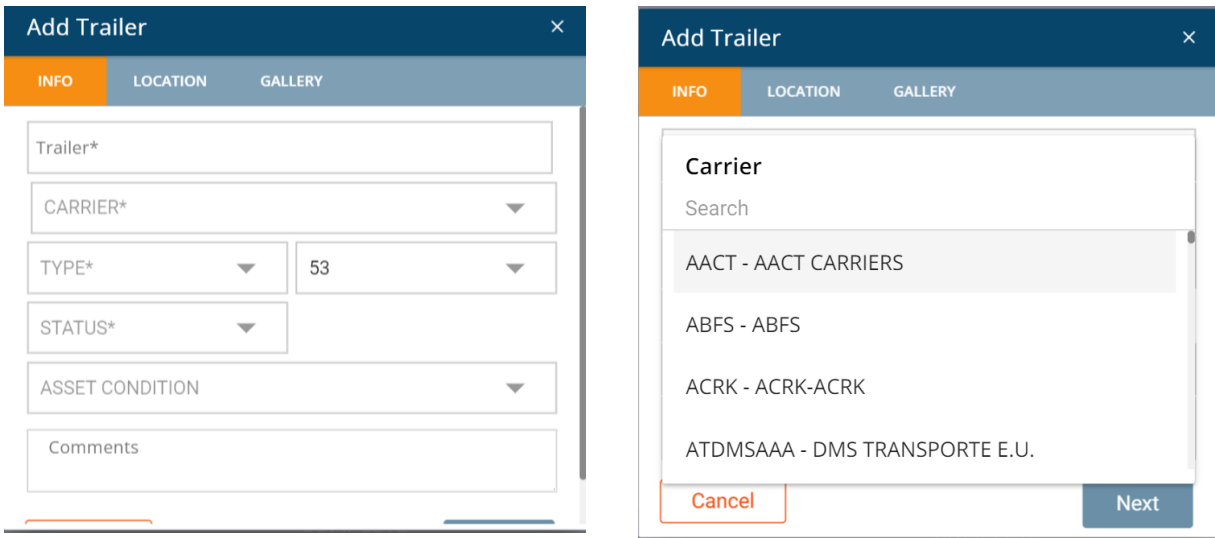

Supporting Documentation: [Carrier Notifications](#)

1.1.3. Updated Carrier Field for Add Trailer Workflow in Spotter Mobile Application

Users Impacted: Spotters

Update Summary: When adding a trailer through the Spotter Mobile App, the **CARRIER*** field now shows the carrier name and SCAC.

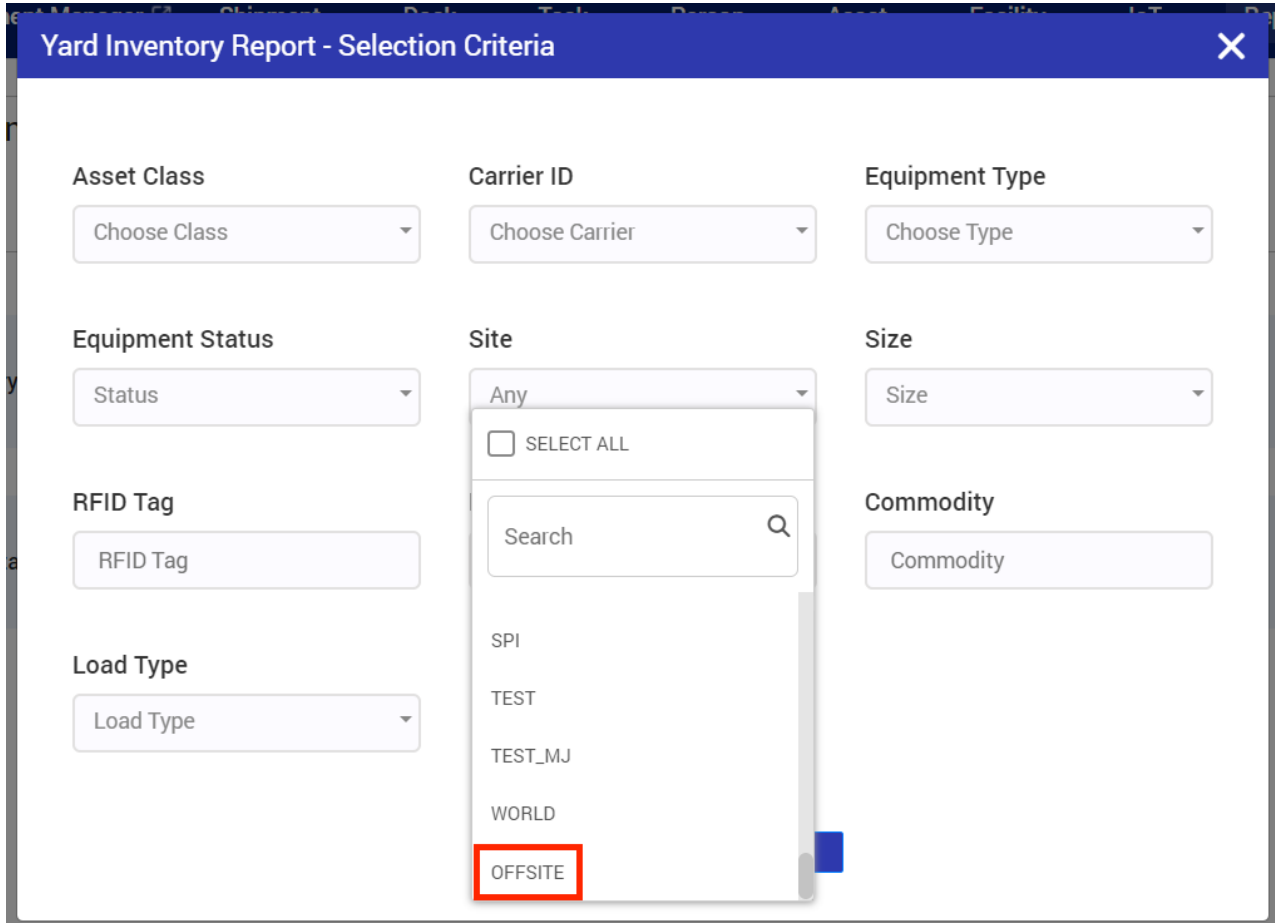

1.1.4. Change to Selection Criteria for the Yard Inventory Report

Users Impacted: Users with Analytics Access

Update Summary: When setting the criteria for a Yard Inventory Report, users will no longer select for assets outside of a facility from the **Assets In** drop down. Users should now use the **Site** drop-down and select **OFFSITE**.

Supporting Documentation: [Generate a Yard Inventory Report for Offsite Assets](#)

1.1.5. [Added June 17, 2024]

- **Anonymous Driver Account Login**
 - **Users Impacted:** All users
 - **Update Summary:** Anonymous users can now log in to an organization's account as a Driver. The anonymous user has read access to organization data including sites, shipments, assets, and gate information.
- **Updates to Gate Activity Report**
 - **Users Impacted:** Users with Analytics Access
 - **Update Summary:** The Gate Activity Report now includes information on the carrier and the driver associated with gate events, specifically:
 - Driver first and last name
 - License plate number
 - Seals for inbound and outbound trailers
 - Inspection questions and answers
- **Yard Inventory Report**
 - **Users Impacted:** Users with Analytics Access
 - **Update Summary:** The Yard Inventory Report has been updated to include Zone as a field and column in the report.

1.2. Bug Fixes

1.2.1. YMS Bug Fixes

- **Resolved Issue:** Seal Numbers and Seal Reason Code are not reflected the same way between Gate Console and Trailer Listing.
- **Resolved Issue:** Vehicle List - Cab is not listed in Type filter when cab records exist.
- **Resolved Issue:** Configuration for Safety notice not being followed.
- **Resolved Issue:** Empty weight is getting removed from departure through the driver kiosk.
- **Resolved Issue:** When creating a Spotter tractor, activity details for the vehicle on Map shows different information from the one on Vehicle Listing details view.
- **Resolved Issue:** Timer in dock console indicating time for trailer at the dock is not updated when arriving a LIVE trailer to a dock.
- *[Added June 17, 2024]* **Resolved Issue:** Driver Kiosk - Empty weight is getting removed from departure through driver kiosk.
- *[Added June 17, 2024]* **Resolved Issue:** Chassis & Seal information is not visible for pending departures.
- *[Added June 17, 2024]* **Resolved Issue:** When export of a report is done, it should show the latest datetime in the file name.

1.2.2. Spotter App Bug Fixes

- **Resolved Issue:** IoT tab does not show RFID tag details associated with the selected trailer in the Trailers Menu.
- **Resolved Issue:** Driver had to repeat the steps while choosing location to complete task.
