1. July 15, 2024 YMS Release Notes

1.1. Appointment Management

Users Impacted: All users

Update Summary: project44's Appointment Management product gives shippers and LSPs a central view to manage appointment scheduling at their yards and facilities. Carriers can self-service appointment scheduling from a dedicated carrier portal. This enhanced version of Appointment Management expands on capabilities available in the previous version and now includes:

- Advanced carrier booking restrictions
- Appointment scheduling at the facility, gate, and dock levels
- Advanced administrator configurations including detailed time block adjustments, holiday scheduling, and day-based exceptions
- Appointment restrictions by carrier, load type, commodity, and shipment attributes
- Automatic appointment booking
- Standardized KPI reporting
