1.1.2. Updates to the Detention Listing Page

Users Impacted: All Users

Update Summary: The Detention Listing page has been updated to include the **In Yard** toggle, found in **More Filters**, to find assets that are onsite or offsite.

The screenshot shows the 'Detention Listing' page in a web application. At the top, there is a navigation bar with various menu items: Map, Gate, Appointment Manager, Shipment, Dock, Task, Person, Asset, and Facility. Below the navigation bar, the page title is 'Detention Listing' with a subtitle '23 Detentions'. There are several filter dropdowns: Site (Any), Trailer Type (Any), Carrier (Any), Load Type (Any), and More Filter (with a filter icon). The main table has columns for Trailer #, Carrier ID, Trailer Type, Load Type, Delivery / Pickup, Site, Free Time, Charge Time, and a new column for Detention End Events. The table contains several rows of data with different trailer IDs, carrier IDs, and load types. To the right of the table is a 'More Filters' sidebar with a close button (X). The sidebar contains several filter categories: Delivery / Pickup, Free Time, Charge Time, Charges, Site, Detention End Time - From, and Detention End Time - To. The 'In Yard' toggle is highlighted with a red box and is currently turned off. Below the sidebar are 'Close' and 'Search' buttons.
