1. August 21, 2024 YMS Release Notes

This article was updated on Tuesday, August 20, 2024. The changes made to the original posting are listed here:

• *Getting Parking Spot Recommendations for Pending Arrivals has been removed from this month's release.*
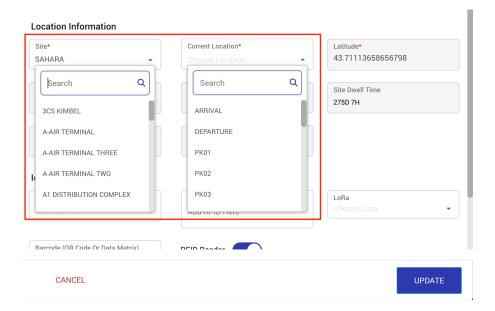

1.1. Feature Updates

1.1.1. Move a Spotter to a New Site

Users Impacted: Administrator users

Update Summary: Administrator users can now make changes to a spotter's location in the YMS. Spotter location changes are made in the Vehicle Listing.

Supporting Documentation: Update a Spotter's Location

1.1.2. Rename or Delete RFID Readers

Users Impacted: Administrator users

Update Summary: Administrator users can rename or delete a previously created RFID reader in the RFID Listing.
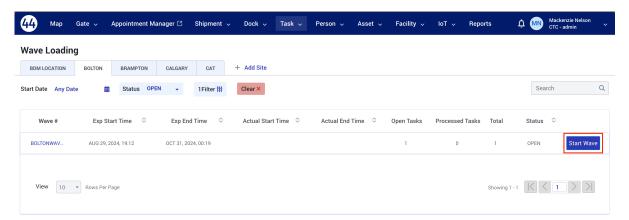

Supporting Documentation: Rename or Delete an RFID Reader

1.1.3. Start and Stop Wave Loads in the Yard Management System (YMS)

Users Impacted: All users

Update Summary: Users can now start and stop wave loads directly in the YMS, rather than just through API.

Supporting Documentation: [Start and Stop Wave Loads](#)

1.1.4. View Changes to Trailer Information Made by Other Users While Editing

Users Impacted: All users

Update Summary: If multiple users are editing information for a trailer at the same time, a warning message appears indicating that information has been changed. The user still editing the trailer information is instructed to refresh their page to view the changes made by the other user.

Supporting Documentation: [Trailer Listing](#)
