

# 1. February 24, 2025 YMS Release Notes

## 1.1 Feature Updates

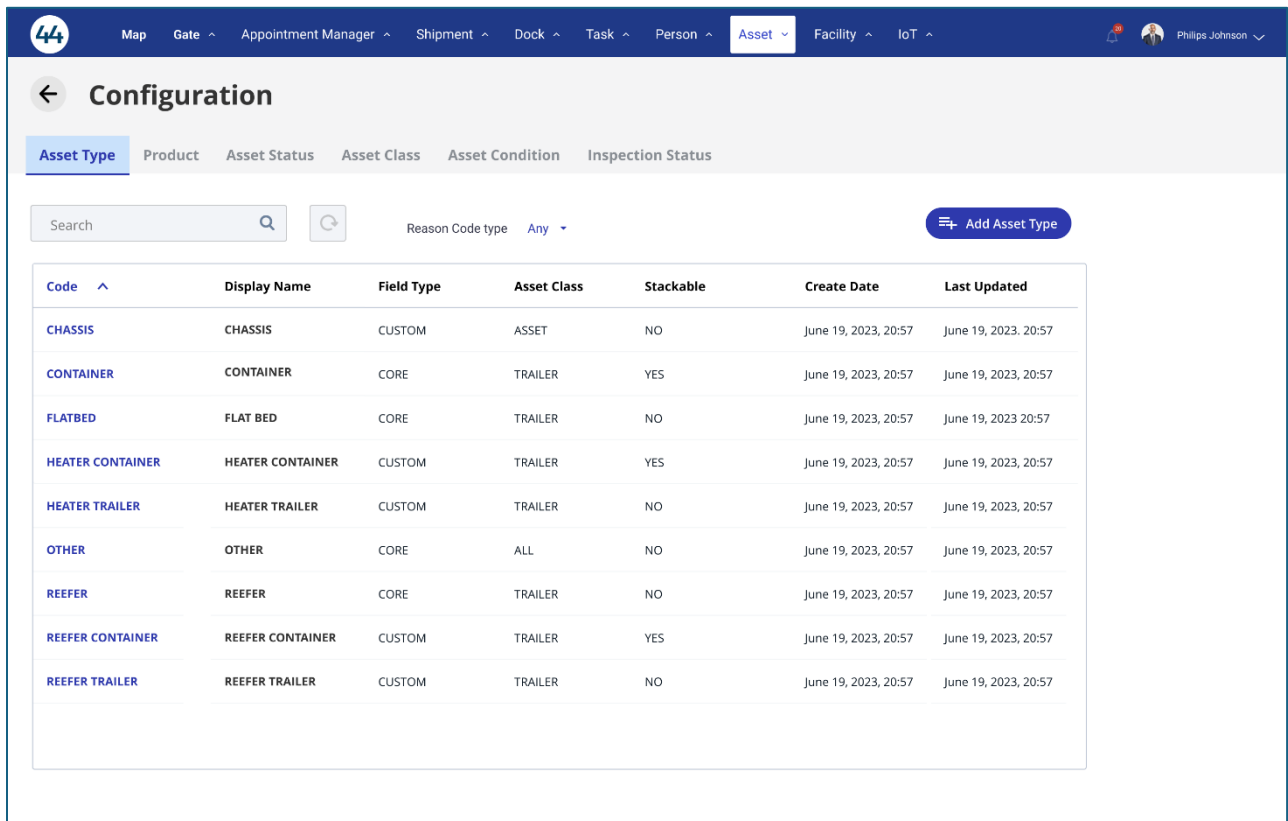

### 1.1.1 Container Stacking.

**Users Impacted:** All Users.

**Update Summary:** The container stacking feature allows the reach stacker operator to move containers between locations and manage their stacking and unstacking. This capability enhances space utilization and efficiency in the container storage area.

As part of the container stacking feature, a new type of asset has been introduced for stackable items.

**Enhancement:** Introduce a new field labeled 'Stackable' to the Asset Type configuration interface.

The screenshot displays the 'Configuration' page in the YMS system, specifically the 'Asset Type' configuration section. The page features a top navigation bar with various menu items and a user profile. Below the navigation bar, the 'Configuration' section is active, showing a list of asset types. The table lists various asset types with columns for Code, Display Name, Field Type, Asset Class, Stackable status, Create Date, and Last Updated. A search bar and a 'Reason Code type' dropdown are also visible above the table. An 'Add Asset Type' button is located in the top right corner of the table area.

Code ^	Display Name	Field Type	Asset Class	Stackable	Create Date	Last Updated
CHASSIS	CHASSIS	CUSTOM	ASSET	NO	June 19, 2023, 20:57	June 19, 2023, 20:57
CONTAINER	CONTAINER	CORE	TRAILER	YES	June 19, 2023, 20:57	June 19, 2023, 20:57
FLATBED	FLAT BED	CORE	TRAILER	NO	June 19, 2023, 20:57	June 19, 2023, 20:57
HEATER CONTAINER	HEATER CONTAINER	CUSTOM	TRAILER	YES	June 19, 2023, 20:57	June 19, 2023, 20:57
HEATER TRAILER	HEATER TRAILER	CUSTOM	TRAILER	NO	June 19, 2023, 20:57	June 19, 2023, 20:57
OTHER	OTHER	CORE	ALL	NO	June 19, 2023, 20:57	June 19, 2023, 20:57
REEFER	REEFER	CORE	TRAILER	NO	June 19, 2023, 20:57	June 19, 2023, 20:57
REEFER CONTAINER	REEFER CONTAINER	CUSTOM	TRAILER	YES	June 19, 2023, 20:57	June 19, 2023, 20:57
REEFER TRAILER	REEFER TRAILER	CUSTOM	TRAILER	NO	June 19, 2023, 20:57	June 19, 2023, 20:57

## Container Move Requests

The container request screen facilitates the creation of move tasks for the container stacking area.

- Put away request – Creates a container move task from the parking area to the stacking area location.
- Retrieval request – Creates a container move task from the stacking area to a parking location

The Container Request screen can be accessed via the main menu by navigating to Task > Container Request.
